Oil Fluoroscope

FL-1000

The oil fluoroscope is versatile, dual-purpose instrument designed for the on site or laboratory inspection of drill cuttings for the presence of oil. The portable, easy-to-use fluoroscope is provided with easy access side doors, flip top lamp and bulb holder, high intensity lamps, and rubber goggles. The operator can use a white light to examine drill cuttings and then switch to an ultraviolet light to determine the existence of hydrocarbons. All of this can be accomplished without removing the sample from the instrument. The instrument comes standard with a single white light and four (4) fluorescent black light bulbs.

Ordering Information

Model Number	Electric
FL-1000-00, Oil Fluoroscope	Elec. 110 VAC 60 Hz
FL-1000-02, Oil Fluoroscope	Elec. 220-240 VAC 50/60 Hz

Spare Parts
