

PREDICT-K “TIP OF THE MONTH”

2017 Hydraulic Fracturing Conference

As I am sure most of you know, this year’s Hydraulic Fracturing Technology Conference will be held in the Woodlands from January 24th – 26th. The StimLab group in conjunction with the ProTechnics division of Core Laboratories will be exhibiting at booth #604. As part of our exhibit, we will have a large screen TV set up and connected to a laptop running Predict-K. Whether you are new to Predict-K or have been using the software for years, this arrangement will provide a unique opportunity for some one-on-one training or a demonstration and discussion on how to utilize Predict-K to answer a particular question.

Some Predict-K demonstration files and exercises will be preloaded if you just want to see Predict-K in action, but we can also load your Predict-K files or well information live to deliver immediate support to your current project. Our booth will be staffed throughout the exhibition hours of the conference. Feel free to stop by with your questions or contact us if you would like to schedule a time to receive your personalized demonstration.

These Predict-K tips are emailed so they can be easily forwarded to others that may not be on the email distribution list. We hope you enjoy these tips and find them useful, but if you would like to be removed from this list please click the Unsubscribe link below. A new email will be created using your default email client. If the link does not work for you simply reply to this email with 'Unsubscribe' in the subject line and you will be removed from the list. If this email was forwarded to you and you would like to be added to the distribution list, please forward this email to Stimlab.Contact@corelab.com with 'Subscribe' in the subject line.
