

# Manual Gas 2000 by

Specifications	
Volume	2000 ml
Pressure	Vacuum to 2 bar
Temperature	Ambient
Volume Accuracy	$\pm 0.1$ ml
Pressure Accuracy	$\pm 0.1$ mbar
Temperature Accuracy	$\pm 0.1^{\circ}\text{C}$

## General Features

This equipment is composed of following elements :

- Absolute Linear Encoder
- Automatic Moving Piston under 0.2 bar over pressure
- 2 Manual Valves
- Handle Adjusting Piston Position at standard pressure
- Calibrated Glass Tube
- Absolute Pressure sensors

All wetted parts are made of Stainless Steel (ref SS316) except the tube (Glass) and the piston (Gas Resistant Plastic)
