

RAPID™ Analytics

Gain insight while reducing risk and uncertainty
in the decision-making process.

Explore your data like never before with RAPID Analytics™. This service represents a breakthrough in analytical capabilities for geological, engineering and petrophysical datasets.

Transfer Data To Action

- Discover new insights into the reservoir
- Analyze critical petrophysical, geologic, and engineering data
- Significantly reduce time spent on finding, formatting, and analyzing data

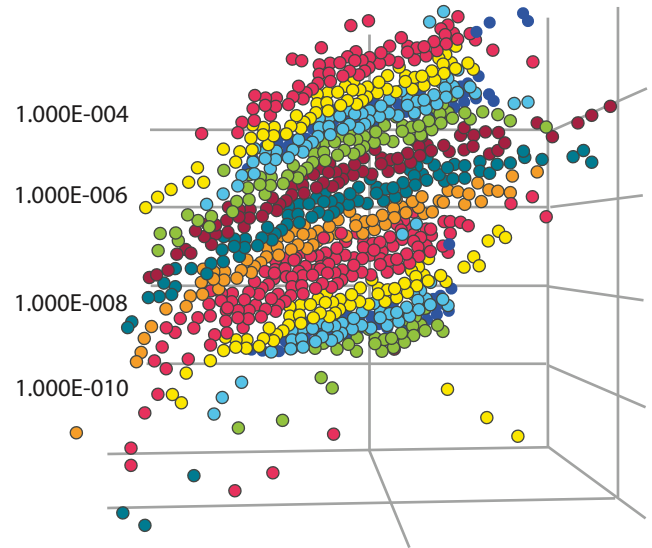

Let Core Lab Do the Heavy Lifting

- Core Lab will create analytical guides for your team
 - End-users do not need to be Spotfire experts
 - No wasted time standardizing/combining datasets
 - Guides are automatically populated with up-to-date data when opened
- Core Lab's Spotfire server and software
 - No need to have your own Spotfire server or software
 - If you desire, you can connect to Core Lab via your own Spotfire software

Benefit from Powerful Features

- Wide range of interactive maps, log cross-sections, statistics, and many other visualizations
- Filter by basin, formation, location, geological age, and much more!
- Zoom and rotate 3D graphs in all directions
- Easy export to PowerPoint, Excel, and other applications

Customized Templates

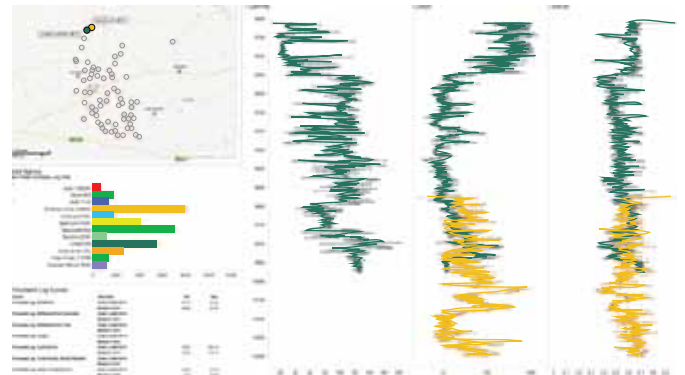

- Core Lab can customize interactive visualizations based on your needs
- Provide Core Lab your proprietary data to create a relevant and secure analytical guide
- Enhance your interactive experience and get the answers you need
- Your proprietary data can be visually merged with consortias your company has joined
 - Your data can be toggled with a filter
 - Compare your data directly to consortia data
 - Increase data, increase insight

Consortia Templates

- Corresponding templates available for any Core Lab joint industry project you have joined
- “Analytical Elite” option provides all current and future templates for projects you have joined

Convenient Connections

- Connect via Core Lab’s software
- If you desire, connect via your own software
- You can access Core Lab’s Web Player
 - No software required
 - Available conveniently online
