

RAPIDZOOMTM SLAB

Explore Your Core From Anywhere

This virtual viewer puts core slabs at our fingertips regardless of your physical location. Gain and share insight at a microscale level while reducing risk and uncertainty from anywhere in the world.

Explore

Interactive view of the core with an incredible level of detail

Collaborate

Share notations, ask questions, and get information on exact points of interest

Toggle

View multiple light contrasts at the same time by toggling between white light and UV

Measure

Take point to point measurements and export measurement logs

New features in development to help take your exploration to discovery
