SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2025

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-41695

CORE LABORATORIES INC.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

98-1164194
(I.R.S. Employer Identification No.)

6316 Windfern Road
Houston, TX
(Address of principal executive offices)

77040
(Zip Code)

(713) 328-2673
(Registrant's telephone number, including area code)

None
(Former name, former address and former fiscal year, if changed since last report)

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Trading Symbol(s)</u>	<u>Name of each exchange on which registered</u>
Common Stock (par value \$0.01)	CLB	New York Stock Exchange

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐ Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The number of shares of common stock of the registrant, par value \$0.01 per share, outstanding at October 17, 2025 was 46,563,387.

CORE LABORATORIES INC.
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. DESCRIPTION OF BUSINESS

References to “Core Lab”, “Core Laboratories”, the “Company”, “we”, “our” and similar phrases are used throughout this Quarterly Report on Form 10-Q (“Quarterly Report”) and relate collectively to Core Laboratories Inc. and its consolidated subsidiaries.

We operate our business in two segments: (1) Reservoir Description and (2) Production Enhancement. These complementary operating segments provide different services and products and utilize different technologies for evaluating and improving reservoir performance and increasing oil and gas recovery from new and existing fields. For a description of the types of services and products offered by these operating segments, see Note 16 - *Segment Reporting*.

2. SIGNIFICANT ACCOUNTING POLICIES UPDATE

Basis of Presentation and Principles of Consolidation

The accompanying unaudited interim consolidated financial statements include the accounts of Core Laboratories Inc. and its subsidiaries for which we have a controlling voting interest and/or a controlling financial interest. These financial statements have been prepared in accordance with United States Generally Accepted Accounting Principles (“U.S. GAAP”) for interim financial information using the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, these financial statements do not include all of the information and footnote disclosures required by U.S. GAAP for the annual financial statements and should be read in conjunction with the audited financial statements and notes thereto included in Core Laboratories Inc.’s Annual Report on Form 10-K for the year ended December 31, 2024, including Note 2 - *Summary of Significant Accounting Policies*. Core Laboratories Inc.’s balance sheet information for the year ended December 31, 2024, was derived from the 2024 audited consolidated financial statements. There have been no changes to the accounting policies during the nine months ended September 30, 2025.

Core Laboratories Inc. uses the equity method of accounting for investments in which it has less than a majority interest and does not exercise control but does exert significant influence. Non-controlling interests have been recorded to reflect outside ownership attributable to consolidated subsidiaries that are less than 100% owned. All inter-company transactions and balances have been eliminated in consolidation.

In the opinion of management, all adjustments considered necessary for a fair statement of the results for the interim periods presented have been included in these financial statements. Furthermore, the operating results presented for the three and nine months ended September 30, 2025, may not necessarily be indicative of the results that may be expected for the year ending December 31, 2025.

Certain reclassifications were made to prior period amounts in order to conform to the current period presentations. These reclassifications had no impact on the reported net income or cash flows for the three and nine months ended September 30, 2024.

Property, Plant and Equipment

We review our long-lived assets (“LLA”) for impairment when events or changes in circumstances indicate that their net book value may not be recovered over their remaining service lives. Indicators of possible impairment may include significant declines in activity levels in regions where specific assets or groups of assets are located, extended periods of idle use, declining revenue or cash flow or overall changes in general market conditions.

The geopolitical conflict between Russia and Ukraine, which began in February 2022 and has continued through September 30, 2025, has resulted in disruptions to our operations in Russia and Ukraine. As of September 30, 2025, our

laboratory facilities, offices, and locations in Russia and Ukraine continued to operate with no significant impact to local business operations. Therefore, we determined there was no triggering event for LLA impairment in Russia and Ukraine, and no impairment assessments have been performed as of September 30, 2025.

Recent Accounting Pronouncements

Issued But Not Yet Effective

In December 2023, FASB issued ASU 2023-09 Income Taxes (Topic 740): Improvements to Income Tax Disclosures to improve transparency of income tax disclosures, primarily by requiring consistent categories and greater disaggregation of information in the rate reconciliation and income taxes paid disaggregated by jurisdiction. The amendment is effective for annual periods beginning after December 15, 2024. Early adoption is permitted. The amendment should be applied prospectively; however, retrospective application is permitted. Upon adoption, our disclosures regarding income taxes will be expanded accordingly.

In November 2024, FASB issued ASU 2024-03 Income Statement – Reporting Comprehensive Income – Expense Disaggregation Disclosures (Subtopic 220-40) to improve disclosures about a public business entity’s expenses, by providing more detailed information about the types of expenses in commonly presented expense captions. As amended by ASU 2025-01 issued in January 2025, the amendment is effective for annual periods beginning after December 15, 2026, and interim periods within annual reporting periods beginning after December 15, 2027. Early adoption is permitted. The amendment may be applied prospectively or retrospectively. Upon adoption, our disclosures regarding expenses will be expanded.

In July 2025, FASB issued ASU 2025-05 Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses for Accounts Receivable and Contract Assets, which allows public business entities to apply a practical expedient when estimating expected credit losses that assumes that current conditions as of the balance sheet date do not change for the remaining life of the asset. The amendment is effective for annual and interim periods beginning after December 15, 2025. Early adoption is permitted. The amendment will be applied prospectively. Upon adoption, our disclosures regarding estimating expected credit losses will be expanded.

3. ACQUISITIONS AND DIVESTURES

We had no significant business acquisitions or divestures during the three and nine months ended September 30, 2025 and 2024.

Subsequent to the quarter ending September 30, 2025, on October 1, 2025, we acquired 100% of the equity interests in Solintec Consultoria E Servicos De Geologia Ltda., a Brazilian limited liability company and a leading provider of geological services to the region’s oil and gas industry. The acquisition is included in our Reservoir Description operating segment.

The total purchase price is comprised of an initial cash payment of \$2.3 million plus up to \$3.7 million of additional contingent cash consideration, payable in annual installments, provided certain performance targets are achieved over the two-year period following closing.

We have not finalized the assessment of the fair values of assets acquired, including intangible assets, and liabilities assumed or the resulting goodwill and its taxability. Fair value estimates of certain assets and liabilities require more current financial information or are based on significant judgments and assumptions. Our estimates of acquisition date fair value will be adjusted where required as additional information is received during the measurement period subsequent to the acquisition date, not to exceed one year.

4. CONTRACT ASSETS AND LIABILITIES

The balance of contract assets and liabilities consisted of the following (in thousands):

	September 30, 2025	December 31, 2024
Contract assets:		
Current	\$ 1,162	\$ 370
	<u>\$ 1,162</u>	<u>\$ 370</u>
Contract liabilities:		
Current	\$ 426	\$ 560
	<u>\$ 426</u>	<u>\$ 560</u>
		September 30, 2025
Estimate of when contract liabilities will be recognized as revenue:		
Within 12 months		\$ 426

The current portion of contract assets is included in our accounts receivable. The current portion of contract liabilities is included in unearned revenues and, as applicable, the non-current portion of contract liabilities is included in other long-term liabilities.

We did not recognize any impairment losses on our contract assets during the three and nine months ended September 30, 2025 and 2024.

5. INVENTORIES

Inventories consist of the following (in thousands):

	September 30, 2025	December 31, 2024
Finished goods	\$ 28,940	\$ 27,127
Parts and materials	26,525	28,953
Work in progress	2,776	3,322
Total inventories	<u>\$ 58,241</u>	<u>\$ 59,402</u>

We include freight costs incurred for shipping inventory to our clients in the cost of product sales caption in the accompanying consolidated statements of operations.

6. LEASES

We have operating leases primarily consisting of office and lab space, machinery and equipment and vehicles. We entered into a sublease agreement in 2023 that was terminated at the beginning of 2025, for existing office and lab space in Calgary, Alberta, Canada.

The components of lease expense and other information are as follows (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2025	2024	2025	2024
Consolidated Statements of Operations:				
Operating lease expense	\$ 4,243	\$ 4,296	\$ 12,589	\$ 12,942
Short-term lease expense	453	393	1,334	1,230
Variable lease expense	425	212	1,284	1,032
Sublease income	—	(56)	—	(169)
Total lease expense	<u>\$ 5,121</u>	<u>\$ 4,845</u>	<u>\$ 15,207</u>	<u>\$ 15,035</u>
Consolidated Statements of Cash Flows:				
Operating cash flows - operating leases payments	\$ 3,927	\$ 3,882	\$ 12,822	\$ 12,791
Right of use assets obtained (released) in exchange for operating lease obligations	\$ 2,184	\$ 3,647	\$ 7,060	\$ 10,606
Other information:				
Weighted-average remaining lease term - operating leases	8.19 years	8.40 years	8.19 years	8.40 years
Weighted-average discount rate - operating leases	5.48%	5.41%	5.48%	5.41%

Scheduled undiscounted lease payments for non-cancellable operating leases consist of the following (in thousands):

	September 30, 2025
	Operating Leases
Remainder of 2025	\$ 3,786
2026	12,927
2027	10,140
2028	7,903
2029	5,330
Thereafter	26,146
Total undiscounted lease payments	66,232
Less: Imputed interest	(13,233)
Total operating lease liabilities	<u>\$ 52,999</u>

7. LONG-TERM DEBT, NET

We have no finance lease obligations. Debt is summarized in the following table (in thousands):

	Interest Rate	Maturity Date	September 30, 2025	December 31, 2024
Credit Facility			\$ 7,000	\$ 18,000
2021 Senior Notes Series A ⁽¹⁾	4.09%	January 12, 2026	45,000	45,000
2021 Senior Notes Series B ⁽¹⁾	4.38%	January 12, 2028	15,000	15,000
2023 Senior Notes Series A ⁽²⁾	7.25%	June 28, 2028	25,000	25,000
2023 Senior Notes Series B ⁽²⁾	7.50%	June 28, 2030	25,000	25,000
Total long-term debt			117,000	128,000
Less: Debt issuance costs			(2,897)	(1,889)
Long-term debt, net			<u>\$ 114,103</u>	<u>\$ 126,111</u>

(1) Interest is payable semi-annually on June 30 and December 30.

(2) Interest is payable semi-annually on March 28 and September 28.

On July 22, 2025, we, along with our direct subsidiary Core Laboratories (U.S.) Interests Holdings, Inc. (“CLIH”) entered into the Ninth Amended and Restated Credit Agreement (as amended, the “Credit Facility”) for an aggregate borrowing commitment of \$150.0 million with a \$50.0 million “accordion” feature. Draws up to \$100.0 million are available in the form of a revolving credit facility, and a single draw of \$50.0 million is available in the form of a delayed draw term loan (“DDTL”)

through January 12, 2026. The DDTL is repayable in quarterly installments of \$625 thousand and prepayments are permitted without penalty. Any remaining outstanding balances under the revolving credit facility and the DDTL are due at maturity on July 22, 2029, subject to springing maturity dates unless the Company's liquidity equals or exceeds the principal amount of each of the respective senior notes series that remain outstanding on each of the respective springing maturity dates as follows:

- (1) October 14, 2027, if any portion of the Company's 2021 Senior Notes Series B due January 12, 2028, in the aggregate principal amount of \$15.0 million, remains outstanding on October 14, 2027, and
- (2) March 30, 2028, if any portion of the Company's 2023 Senior Notes Series A due June 28, 2028, in the aggregate principal amount of \$25.0 million, remains outstanding on March 30, 2028.

There are no significant changes to other terms from the Eighth Amended and Restated Credit Agreement, including assets securing the debt, interest rates, and cross default provisions associated with the Senior Notes (as defined below), financial covenants or the interest coverage and leverage ratios as described below.

The Credit Facility is secured by first priority interests in (1) substantially all of the tangible and intangible personal property, and equity interest of CLIH and certain of the Company's U.S. and foreign subsidiary companies and (2) instruments evidencing intercompany indebtedness owing to the Company, CLIH and certain of the Company's U.S. and foreign subsidiary companies. Certain of our significant, wholly owned subsidiaries are guarantors or co-borrowers under the Credit Facility and Senior Notes.

Under the Credit Facility, the Secured Overnight Financing Rate ("SOFR") plus 2.00% to SOFR plus 3.00% will be applied to outstanding borrowings. The available capacity at any point in time is reduced by outstanding borrowings and outstanding letters of credit which totaled approximately \$11.1 million at September 30, 2025, resulting in an available borrowing capacity under the Credit Facility of approximately \$131.9 million. In addition to indebtedness under the Credit Facility, we had approximately \$8.0 million of outstanding letters of credit and performance guarantees and bonds from other sources as of September 30, 2025.

The Credit Facility and Senior Notes include a cross-default provision, whereby a default under one agreement may trigger a default in the other agreements.

The terms of the Credit Facility and Senior Notes require us to meet certain covenants, including, but not limited to, an interest coverage ratio (calculated as consolidated EBITDA divided by interest expense) and a leverage ratio (calculated as consolidated net indebtedness divided by consolidated EBITDA), where consolidated EBITDA (as defined in each agreement) and interest expense are calculated using the most recent four fiscal quarters. The Credit Facility has more restrictive covenants with a minimum interest coverage ratio of 3.00 to 1.00 and permits a maximum leverage ratio of 2.50 to 1.00. The Credit Facility allows non-cash charges such as impairment of assets, stock compensation and other non-cash charges to be added back in the calculation of consolidated EBITDA. The terms of our Credit Facility also allow us to negotiate in good faith to amend any ratio or requirement to preserve the original intent of the agreement if any change in accounting principles would affect the computation of any financial ratio or covenant of the Credit Facility. In accordance with the terms of the Credit Facility, our leverage ratio is 1.10 and our interest coverage ratio is 7.86, each for the period ended September 30, 2025. We are in compliance with all covenants contained in our Credit Facility and Senior Notes as of September 30, 2025.

We, along with CLIH as issuer, have senior notes outstanding that were issued through private placement transactions. Series A and Series B of the 2021 Senior Notes were issued in 2021 (the "2021 Senior Notes"). Series A and Series B of the 2023 Senior Notes were issued in 2023 (the "2023 Senior Notes"). The 2021 Senior Notes and the 2023 Senior Notes are collectively the "Senior Notes". We intend to repay the 2021 Senior Notes Series A at maturity in January 2026 using borrowings under the Credit Facility; therefore, we continue to classify them as long-term debt.

See Note 11 - *Derivative Instruments and Hedging Activities* for additional information regarding interest rate swap agreements we have entered to fix the underlying risk-free rate on our Senior Notes.

The estimated fair value of total debt at September 30, 2025 and December 31, 2024, approximated the book value of total debt. The fair value was estimated using Level 2 inputs by calculating the sum of the discounted future interest and principal payments through the maturity date.

8. PENSION AND OTHER POSTRETIREMENT BENEFIT PLANS

Prior to January 2020, one of our subsidiaries provided a noncontributory defined benefit pension plan covering substantially all of our Dutch employees (“Dutch Plan”) who were hired prior to 2000. This pension benefit was based on years of service and final pay or career average pay, depending on when the employee began participating. The Dutch Plan was curtailed prior to January 2020, and these employees have been moved into the Dutch defined contribution plan. However, the unconditional indexation for this group of participants continues for so long as they remain in active service with the Company.

The following table summarizes the components of net periodic pension cost under the Dutch Plan (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2025	2024	2025	2024
Interest cost	\$ 386	\$ 352	\$ 1,106	\$ 1,054
Expected return on plan assets	(312)	(314)	(893)	(891)
Net periodic pension cost	\$ 74	\$ 38	\$ 213	\$ 163

9. COMMITMENTS AND CONTINGENCIES

We have been and may, from time to time, be named as a defendant in legal actions that arise in the ordinary course of business. These include, but are not limited to, employment-related claims and contractual disputes or claims for personal injury or property damage which occur in connection with the provision of our services and products. A liability is accrued when a loss is both probable and can be reasonably estimated.

See Note 7 - *Long-term Debt, net* for amounts committed under letters of credit and performance guarantees and bonds.

10. EQUITY

Treasury Stock

During the three and nine months ended September 30, 2025, we distributed 12,402 and 91,602 shares, respectively, of treasury stock upon vesting of stock-based awards. During the three and nine months ended September 30, 2025, we repurchased 462,248 and 831,478 shares, respectively, of our common stock for \$5.0 million and \$9.8 million, respectively. The total repurchased shares include rights which were surrendered to us pursuant to the terms of a stock-based compensation plan in consideration of the participant’s tax burdens resulting from the issuance of common stock under that plan. Rights surrendered to us were 4,461 and 16,915 shares valued at \$47 thousand and \$211 thousand for the three and nine months ended September 30, 2025, respectively. Such shares of common stock, unless canceled, may be reissued for a variety of purposes such as future acquisitions, non-employee director stock awards or employee stock awards.

Dividend Policy

In March, May and August 2025, we paid a quarterly cash dividend of \$0.01 per share of common stock. In addition, on October 22, 2025, we declared a quarterly cash dividend of \$0.01 per share of common stock for shareholders of record on November 3, 2025, and payable on November 24, 2025.

Accumulated Other Comprehensive Income (Loss)

Amounts recognized, net of income tax, in accumulated other comprehensive income (loss) consist of the following (in thousands):

	September 30, 2025	December 31, 2024
Pension and other post-retirement benefit plans - unrecognized prior service costs and net actuarial loss	\$ (5,719)	\$ (5,890)
Interest rate swaps - net gain (loss) on fair value	(265)	121
Total accumulated other comprehensive income (loss)	<u>\$ (5,984)</u>	<u>\$ (5,769)</u>

11. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

We are exposed to market risks related to fluctuations in interest rates. To mitigate these risks, we may utilize derivative instruments in the form of interest rate swaps. We do not enter into derivative transactions for speculative purposes.

In March 2021, we entered into a forward interest rate swap agreement and carried the fair value of certain terminated variable-to-fixed swaps into the agreement in a “blend and extend” structured transaction. The purpose of this forward interest rate swap agreement is to fix the underlying risk-free rate, that would be associated with the anticipated issuance of new long-term debt by the Company in future periods. The forward interest rate swap would hedge the risk-free rate on forecasted long-term debt through March 2033. Risk associated with future changes in the 10-year LIBOR interest rates have been fixed up to a notional amount of \$60.0 million with this instrument. The interest rate swap qualifies as a cash flow hedging instrument. This forward interest rate swap agreement was terminated and settled in April 2022. The hedging relationship is highly effective, therefore, the gain on the termination of the forward interest rate swap was included in accumulated other comprehensive income (loss). On June 28, 2023, the Company issued the 2023 Senior Notes in the aggregate principal amount of \$50.0 million at fixed interest rates of 7.25% and 7.50%. The Company has elected to apply the optional expedient for hedging relationships affected by reference rate reform. Accordingly, no outstanding balance on the 2023 Senior Notes will preclude cash flow hedging with the existing LIBOR hedging instrument. A net loss of \$0.3 million is included in accumulated other comprehensive income (loss) at September 30, 2025. The unamortized balance on this swap will be amortized into interest expense in accordance with the forecasted transactions or the scheduled interest payments on the 2023 Senior Notes and any future debt through March 2033.

The effect of interest rate swaps on the consolidated statements of operations is as follows (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,		Income Statement Classification
	2025	2024	2025	2024	
Derivatives designated as hedges:					
5 year interest rate swap	\$ —	\$ 5	\$ (12)	\$ 67	Increase (decrease) to interest expense
10 year interest rate swap	(108)	(240)	(477)	(847)	Increase (decrease) to interest expense
	<u>\$ (108)</u>	<u>\$ (235)</u>	<u>\$ (489)</u>	<u>\$ (780)</u>	

12. FINANCIAL INSTRUMENTS

The Company’s only financial assets and liabilities which are measured at fair value on a recurring basis relate to certain aspects of the Company’s benefit plans. We use the market approach to determine the fair value of these assets and liabilities using significant other observable inputs (Level 2) with the assistance of third-party specialists. We do not have any assets or liabilities measured at fair value on a recurring basis using quoted prices in an active market (Level 1) or significant unobservable inputs (Level 3). Gains and losses related to the fair value changes in the financial assets and liabilities are recorded in general and administrative expense in the consolidated statements of operations.

The following table summarizes the fair value balances (in thousands):

		Fair Value Measurement at September 30, 2025			
		Total	Level 1	Level 2	Level 3
Assets:					
Company owned life insurance policies ⁽¹⁾		\$ 26,518	\$ —	\$ 26,518	\$ —
		<u>\$ 26,518</u>	<u>\$ —</u>	<u>\$ 26,518</u>	<u>\$ —</u>
Liabilities:					
Deferred compensation liabilities		\$ 20,536	\$ —	\$ 20,536	\$ —
		<u>\$ 20,536</u>	<u>\$ —</u>	<u>\$ 20,536</u>	<u>\$ —</u>
		Fair Value Measurement at December 31, 2024			
		Total	Level 1	Level 2	Level 3
Assets:					
Company owned life insurance policies ⁽¹⁾		\$ 25,435	\$ —	\$ 25,435	\$ —
		<u>\$ 25,435</u>	<u>\$ —</u>	<u>\$ 25,435</u>	<u>\$ —</u>
Liabilities:					
Deferred compensation liabilities		\$ 19,103	\$ —	\$ 19,103	\$ —
		<u>\$ 19,103</u>	<u>\$ —</u>	<u>\$ 19,103</u>	<u>\$ —</u>

(1) Company owned life insurance policies have cash surrender value and are intended to assist in funding deferred compensation liabilities and other benefit plans.

13. OTHER (INCOME) EXPENSE, NET

The components of other (income) expense, net, are as follows (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2025	2024	2025	2024
(Gain) loss on sale of assets	\$ (146)	\$ 364	\$ (369)	\$ (390)
Results of non-consolidated subsidiaries	194	(108)	401	(207)
Foreign exchange (gain) loss, net	354	(239)	841	435
Rents and royalties	(8)	(882)	(24)	(1,683)
Return on pension assets and other pension costs	(312)	(314)	(893)	(891)
Assets write-down, loss on lease abandonment and other exit costs	—	—	707	1,809
Insurance recovery - business interruption and costs	(52)	(1,151)	(1,031)	(3,481)
Insurance recovery - property, plant and equipment	(5,253)	(2,074)	(6,830)	(2,074)
Severance and other charges	—	—	2,256	824
Other, net	(367)	(125)	(1,280)	(415)
Total other (income) expense, net	<u>\$ (5,590)</u>	<u>\$ (4,529)</u>	<u>\$ (6,222)</u>	<u>\$ (6,073)</u>

During the nine months ended September 30, 2025 and 2024, as a result of consolidating and exiting certain facilities in the U.S. and other international locations, we recognized a write-down of the associated leasehold improvements, right of use assets and other assets and incurred lease abandonment and other exit costs of \$0.7 million and \$1.8 million, respectively.

In February 2024, we had a fire incident at our Aberdeen, U.K. facility and we have recorded insurance recovery associated with business interruptions, increase in cost of work, and loss on property and assets during the three and nine months ended September 30, 2025 and 2024. During the three months ended September 30, 2025, Core Lab reached final settlement with the insurance company and recorded a gain of approximately \$5.2 million on the insurance recovery.

Foreign exchange (gain) loss, net by currency is summarized in the following table (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2025	2024	2025	2024
British Pound	\$ (48)	\$ (64)	\$ (108)	\$ 6
Canadian Dollar	43	(13)	(11)	60
Colombian Peso	(38)	44	(98)	13
Euro	(30)	201	772	266
Indonesian Rupiah	100	(332)	133	(107)
Russian Ruble	144	(4)	(189)	10
Swedish Krona	5	23	128	(7)
Other currencies, net	178	(94)	214	194
Foreign exchange (gain) loss, net	<u>\$ 354</u>	<u>\$ (239)</u>	<u>\$ 841</u>	<u>\$ 435</u>

14. INCOME TAX EXPENSE (BENEFIT)

The Company recorded an income tax expense of \$3.8 million and \$7.4 million for the three and nine months ended September 30, 2025, respectively compared to income tax expense of \$4.7 million and \$10.0 million for the three and nine months ended September 30, 2024, respectively. The effective tax rate for the three and nine months ended September 30, 2025, was 20.5% and 22.7%, respectively. The effective tax rate for the three and nine months ended September 30, 2024, was 28.1% and 28.8%, respectively. The effective tax rate for the three and nine months ended September 30, 2025, was primarily impacted by the earnings mix of jurisdictions subject to tax for the period and changes in uncertain tax position in certain jurisdictions which is discrete to the quarter. The tax rate for the three and nine months ended September 30, 2024 was impacted by the earnings mix of jurisdictions subject to tax for the period and items discrete to the quarter.

On July 4, 2025, the “One Big Beautiful Bill Act” (the “Act”) was enacted into law. The Act includes significant provisions, including tax cut extensions and modifications to the U.S. and international tax frameworks. We are evaluating the impact of these legislative changes as additional guidance becomes available. Currently, we do not believe legislation will have a material impact on our tax expense.

15. EARNINGS PER SHARE

We compute basic earnings per share by dividing net income attributable to Core Laboratories Inc. by the number of weighted average common shares outstanding during the period. Diluted earnings per share includes the incremental effect of contingently issuable shares from performance and restricted stock awards, as determined using the treasury stock method.

The following table summarizes the calculation of weighted average common shares outstanding used in the computation of basic and diluted earnings per share (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2025	2024	2025	2024
Weighted average common shares outstanding - basic	46,263	46,922	46,552	46,897
Effect of dilutive securities:				
Restricted shares	31	108	39	76
Performance shares	784	790	790	717
Weighted average common shares outstanding - diluted	<u>47,078</u>	<u>47,820</u>	<u>47,381</u>	<u>47,690</u>

16. SEGMENT REPORTING

We operate our business in two segments. These complementary operating segments provide different services and products and utilize different technologies for evaluating and improving reservoir performance and increasing oil and gas recovery from new and existing fields.

- *Reservoir Description:* Encompasses the characterization of petroleum reservoir rock and reservoir fluids samples to increase production and improve recovery of crude oil and natural gas from our clients' reservoirs. We provide laboratory-based analytical and field services to characterize properties of crude oil and crude oil-derived products to the oil and gas industry. Services associated with these fluids include determining the quality and measuring the quantity of the reservoir fluids and their derived products, such as gasoline, diesel and biofuels. We also provide proprietary and joint industry studies based on these types of analyses and manufacture associated laboratory equipment. In addition, we provide reservoir description capabilities that support various activities associated with energy transition projects, including services that support carbon capture, utilization and storage, geothermal projects, and the evaluation and appraisal of mining activities around lithium and other elements necessary for energy storage.
- *Production Enhancement:* Includes services and manufactured products associated with reservoir well completions, perforations, stimulation, production and well abandonment. We provide integrated diagnostic services to evaluate and monitor the effectiveness of well completions and to develop solutions aimed at increasing the effectiveness of enhanced oil recovery projects.

We use the same accounting policies to prepare our operating segment results as are used to prepare our consolidated financial statements. All interest and other non-operating income (expense) is attributable to Corporate & Other and is not allocated to specific operating segments.

Our chief operating decision maker ("CODM") is our Chief Executive Officer, who also serves as Chairman of the Board of Directors. The CODM uses revenue from unaffiliated clients and segment operating income to allocate resources, primarily for working capital, staffing and capital expenditures, during the annual budgeting process and monthly when comparing actual results to budgeted and forecasted results.

Summarized financial information of our operating segments is shown in the following table (in thousands):

	Reservoir Description	Production Enhancement	Corporate & Other ⁽¹⁾	Consolidated
Three months ended September 30, 2025				
CODM Measure - Revenue from unaffiliated clients	\$ 88,224	\$ 46,297	\$ —	\$ 134,521
Reconciliation of CODM measure - revenue from unaffiliated clients to segment operating income:

(1) "Corporate & Other" represents those items that are not directly related to a particular operating segment and eliminations.

(2) General and administrative expense is presented as a total amount to the CODM and consists primarily of employee compensation costs, professional fees and information technology costs.

(3) Other remaining balance is included in other (income) expense, net. See Note 13 - Other (income) expense, net for further details.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion highlights the current operating environment and summarizes the financial position of Core Laboratories Inc. and its subsidiaries as of September 30, 2025, and should be read in conjunction with (i) the unaudited interim consolidated financial statements and notes thereto included elsewhere in this Quarterly Report and (ii) the audited consolidated financial statements and accompanying notes thereto included in our 2024 Annual Report on Form 10-K for the year ended December 31, 2024.

General

Core Laboratories Inc. is a Delaware corporation. It was established in 1936 and is one of the world's leading providers of proprietary and patented reservoir description and production enhancement services and products to the oil and gas industry. These services and products can enable our clients to evaluate and improve reservoir performance and increase oil and gas recovery from new and existing fields. We make measurements on reservoir rocks, reservoir fluids (crude oil, natural gas and water) and their derived products. In addition, we assist clients in evaluating subsurface targets associated with carbon capture and sequestration projects or initiatives. Core Laboratories Inc. has over 70 offices in more than 50 countries and employs approximately 3,300 people worldwide.

References to "Core Lab", "Core Laboratories", the "Company", "we", "our" and similar phrases are used throughout this Quarterly Report and relate collectively to Core Laboratories Inc. and its consolidated affiliates.

We operate our business in two segments. These complementary operating segments provide different services and products and utilize different technologies for evaluating and improving reservoir performance and increasing oil and gas recovery from new and existing fields.

- *Reservoir Description:* Encompasses the characterization of petroleum reservoir rock and reservoir fluids samples to increase production and improve recovery of crude oil and natural gas from our clients' reservoirs. We provide laboratory-based analytical and field services to characterize properties of crude oil and crude oil-derived products to the oil and gas industry. Services associated with these fluids include determining the quality and measuring the quantity of the reservoir fluids and their derived products, such as gasoline, diesel and biofuels. We also provide proprietary and joint industry studies based on these types of analyses and manufacture associated laboratory equipment. In addition, we provide reservoir description capabilities that support various activities associated with energy transition projects, including services that support carbon capture, utilization and storage, geothermal projects, and the evaluation and appraisal of mining activities around lithium and other elements necessary for energy storage.
- *Production Enhancement:* Includes services and manufactured products associated with reservoir well completions, perforations, stimulation, production and well abandonment. We provide integrated diagnostic services to evaluate and monitor the effectiveness of well completions and to develop solutions aimed at increasing the effectiveness of enhanced oil recovery projects.

Cautionary Statement Regarding Forward-Looking Statements

This Quarterly Report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 ("Exchange Act"). Certain statements contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations section, including those under the headings "Outlook" and "Liquidity and Capital Resources", and in other parts of this Quarterly Report, are forward-looking. In addition, from time to time, we may publish forward-looking statements relating to such matters as anticipated financial performance, business prospects, technological developments, new products, research and development activities and similar matters. Forward-looking statements can be identified by the use of forward-looking terminology such as "may", "will", "believe", "expect", "anticipate", "estimate", "continue", or other similar words, including statements as to the intent, belief, or current expectations of our directors, officers, and management with respect to our future operations, performance, or positions or

which contain other forward-looking information. These forward-looking statements are based on our current expectations and beliefs concerning future developments and their potential effect on us. While management believes that these forward-looking statements are reasonable as and when made, no assurances can be given that the future results indicated, whether expressed or implied, will be achieved. While we believe that these statements are and will be accurate, our actual results and experience may differ materially from the anticipated results or other expectations expressed in our statements due to a variety of risks and uncertainties.

We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. For a more detailed discussion of some of the foregoing risks and uncertainties, see Part II, “Item 1A - Risk Factors” of this Quarterly Report and “Item 1A - Risk Factors” of our Annual Report on Form 10-K for the year ended December 31, 2024, filed by us with the Securities and Exchange Commission (“SEC”).

Outlook

According to the latest reports from the U.S. Energy Information Administration, the International Energy Agency (“IEA”) and the Organization of the Petroleum Exporting Countries and other oil producing nations (“OPEC+”), global demand for crude oil and natural gas is expected to continue increasing in 2025 and beyond. New tariffs announced by the U.S. during the year have triggered global trade negotiations and have raised the level of uncertainty for global economies. Additionally, OPEC+ affirmed their decision to proceed with a gradual return of 2.2 million barrels of daily production by removing the voluntary production restrictions established in 2023. The gradual increase in production from OPEC+ began in May 2025 with incremental increases in production expected through September 2026, which could create a surplus in supply and lead to lower commodity prices. OPEC also published an updated “compensation plan” which shows committed reductions in production for countries that produced volumes over their committed quotas since January 2024, which if complied with, should partially offset the scheduled increases to production quotas. In each announcement from OPEC+ regarding the production increases, they have also stated they will continue to hold monthly meetings to review market conditions, conformity, and compensation.

The uncertainty around the impact global trade negotiations may have on global economies combined with OPEC+’s announcement of increased production quotas has also increased the likelihood that global inventory levels of crude oil will rise, thereby contributing to weaker crude oil prices. The Company believes that activity levels associated with smaller-scale, short-cycle crude oil development projects will be more sensitive to a decrease and/or continued volatility of crude-oil prices. As such, we expect changes in crude oil prices will have a greater impact on drilling and completion activity levels in the U.S. onshore market. Outside the U.S., large-scale international oil and gas projects are expected to be more resilient to the near-term volatility of crude-oil prices, and the Company anticipates current client projects to continue as planned and additional projects scheduled this year to also be executed as planned. Recently, revised IEA field data showed that a steeper natural decline rate may represent a dominant long-term supply risk, where the agency projected a sustained upstream investment of approximately \$540 to \$570 billion per year is required to prevent disruptive declines and to avoid price volatility.

The ongoing geopolitical conflicts between Russia and Ukraine and in the Middle East, along with associated and expanded sanctions in the United States, the European Union, the United Kingdom and other countries continue to cause disruptions to traditional maritime supply chains and the trading of crude oil and derived products, such as diesel fuel. These disruptions to the trading and maritime transportation of crude oil, also impact the demand for the Company’s associated laboratory assay services. Although demand for the Company’s laboratory assay analysis services continued to increase during the first nine months of 2025, these geopolitical conflicts and associated sanctions continue to create a higher level of uncertainty. We have no way to predict the progress or outcome of these events, and any resulting government responses are fluid and beyond our control.

We continue to focus on large-scale core analyses and reservoir fluids characterization studies in most oil-producing regions across the globe, which include both newly developed fields and brownfield extensions in many offshore developments in both the U.S. and internationally. In the U.S., we are involved in projects with many of the onshore unconventional basins, as well as

offshore projects in the Gulf of Mexico. Outside the U.S., we continue to work on many small and large-scale projects analyzing reservoir rock and fluid samples in every major producing region of the world. Notable larger projects are in locations such as offshore South America, Australia, West Africa and the Middle East. Analysis and measurement services also occur in every major producing region of the world. Additionally, some of our major clients have increased their investment in projects to capture and sequester carbon dioxide in recent years that has expanded the Company's activities on these projects beginning in 2024 and into 2025.

Our major clients continue to focus on capital management, return on invested capital, free cash flow and returning capital to their shareholders, as opposed to a focus on production growth. The companies adopting value versus volume metrics tend to be the more technologically sophisticated operators and form the foundation of Core Lab's worldwide client base. As oil and gas commodity prices stabilize in the mid-to-long-term, the Company expects our clients' activities associated with increasing oil and gas reserves and production levels will continue to increase in the coming years.

Results of Operations

Operating Results for the Three Months Ended September 30, 2025 compared to the Three Months Ended September 30, 2024 and June 30, 2025 and for the Nine Months Ended September 30, 2025 compared to the Nine Months Ended September 30, 2024

Service Revenue

Service revenue is primarily tied to activities associated with the exploration, appraisal, development and production of oil, gas and derived products outside the U.S. For the three months ended September 30, 2025, service revenue was \$101.1 million, an increase of 2% year-over-year and an increase of 5% sequentially. Year-over-year, revenues increased primarily due to the increase in international markets partially offset by lower activity level in the U.S. market. Despite disruptions from the ongoing geopolitical conflicts and expanded sanctions throughout the first nine months of 2025, we continue to see recovery in demand for our laboratory crude-assay services during the third quarter of 2025 and continued growth in well completion diagnostic services in certain international markets when compared to the same period in 2024. Service revenue in 2025 has

been negatively impacted by certain projects that were planned and scheduled but were canceled, as the wells drilled by our clients were determined to be uneconomical or unsuccessful.

Sequentially, the increase in service revenue was primarily due to an increase in demand for laboratory crude-assay services in international markets while the U.S. market remained relatively flat. As discussed above, the expanded sanctions imposed throughout the year have caused a temporary disruption in the trading and maritime transportation of crude oil and derived products that slowed the growth of laboratory crude-assay revenue during 2025.

For the nine months ended September 30, 2025, service revenue was \$292.4 million, relatively flat compared to the same period in the prior year. Year-over-year, the demand for laboratory crude-assay services and well completion diagnostic services continued to grow in the international markets. Additionally, reservoir rock and fluid analysis services have been negatively impacted due to the decline in international offshore commercial success rates for exploration and appraisal well projects, as discussed above.

Product Sales Revenue

Product sales are primarily tied to U.S. onshore drilling and completion activities and product sales to international markets. Product sales to international markets are typically sold and shipped in bulk, and revenue can vary from one quarter to another. For the three months ended September 30, 2025, product sales revenue of \$33.4 million decreased 6% year-over-year and 2% sequentially. The decrease was driven by lower drilling and completion activity onshore in the U.S. for the three months ended September 30, 2025 when compared to the same period in 2024.

Sequentially, the slight decrease was due to the lower level of U.S. onshore drilling and completion activity but was substantially offset by higher levels of bulk shipments to international markets.

For the nine months ended September 30, 2025, product sales revenue was \$95.8 million and decreased 7% compared to the same period in the prior year, primarily due to lower average U.S. onshore drilling and completion activity in 2025 compared to 2024, but was partially offset by an increase of laboratory instrument sales to international markets in 2025.

Cost of Services, excluding depreciation

Cost of services was \$74.9 million for the three months ended September 30, 2025, a decrease of 1% year-over-year and an increase of 1% sequentially. The year-over-year decrease in cost of services was primarily due to increased efficiencies and the benefits of lower compensation costs as a result of cost reduction initiatives implemented during the first half of 2025. Sequentially, the slight increase in cost of services is primarily due to an increase in service revenue partially offset by the increased efficiencies and lower compensation cost as discussed above. Cost of services expressed as a percentage of service revenue was 74% for the three months ended September 30, 2025, compared to 77% for the prior quarter and 76% for the same period in the prior year. Cost of services as a percentage of service revenue improved primarily driven by the efficiencies and cost reduction initiatives as discussed above.

For the nine months ended September 30, 2025, cost of services was \$221.9 million, a decrease of 1% compared to the same period in the prior year. Cost of services expressed as a percentage of service revenue improved to 76% from 77% when compared to the same period in the prior year. The year-over-year decrease in cost of services while service revenue remained relatively flat was primarily due to increased efficiencies and cost reduction initiatives as discussed above.

Cost of Product Sales, excluding depreciation

Cost of product sales was \$30.0 million for the three months ended September 30, 2025, a decrease of 4% year-over-year and an increase of 1% sequentially. Cost of product sales expressed as a percentage of product sales revenue was 90% for the three months ended September 30, 2025, compared to 88% for the same period in the prior year and compared to 87% in the prior quarter. The year-over-year changes in cost of product sales as a percentage of product sales increased primarily due to higher absorption of fixed costs on a lower revenue base that is partially associated with increased tariff cost on certain imported

materials, along with a write-down of certain inventory of approximately \$0.6 million in the three months ended September 30, 2025.

Sequentially, cost of product sales as a percentage of product sales increased due to higher absorption of fixed costs on a lower revenue base.

For the nine months ended September 30, 2025, cost of product sales was \$86.2 million, a decrease of 4% compared to the same period in the prior year. Cost of product sales expressed as a percentage of product sales revenue was 90% for the nine months ended September 30, 2025, compared to 88% from the same period in the prior year. The increase in cost of product sales as a percentage of product sales revenue was due to higher absorption of fixed costs on a lower revenue base as discussed above, along with a write-down of certain inventory totaled \$1.8 million in 2025, with no such write-down in the same period in the prior year.

General and Administrative Expense, excluding depreciation

General and administrative (“G&A”) expense includes corporate management and centralized administrative services that benefit our operations.

G&A expense for the three months ended September 30, 2025, was \$10.7 million, which increased \$2.0 million, compared to the same period in 2024. The year-over-year increase was primarily due to higher stock compensation expense recorded in 2025. In 2024, a portion of stock compensation expense that was previously recognized was reversed to align with the expectations of vesting levels for certain performance share awards.

G&A expense for the three months ended September 30, 2025, was comparable to the prior quarter and increased \$0.2 million or less than 2%.

For the nine months ended September 30, 2025, G&A expense was \$34.8 million which increased \$4.1 million, compared to the nine months ended September 30, 2024. The year-over-year increase was primarily due to (1) a higher total stock compensation cost of \$1.8 million; (2) a lower gain from mark-to-market adjustments on Company-owned life insurance policies of \$1.3 million; and (3) increased license fees and implementation costs associated with a new global human capital management system.

Depreciation and Amortization Expense

Depreciation and amortization expense for the three months ended September 30, 2025, was \$3.6 million, a decrease of 2% year-over-year and sequentially. Depreciation and amortization expense for the nine months ended September 30, 2025, was \$11.0 million, a decrease of 3% year-over-year. The decrease in depreciation and amortization expense compared to the prior year periods and sequentially is primarily due to assets that had become fully depreciated.

Other (Income) Expense, Net

The components of other (income) expense, net, are as follows (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2025	2024	2025	2024

Total other (income) expense, net	<u>\$ (5,590)</u>	<u>\$ (4,529)</u>	<u>\$ (6,222)</u>	<u>\$ (6,073)</u>

During the nine months ended September 30, 2025 and 2024, as a result of consolidating and exiting certain facilities in the U.S. and other international locations, we recognized a write-down of the associated leasehold improvements, right of use assets and other assets and incurred lease abandonment and other exit costs of \$0.7 million and \$1.8 million, respectively.

In February 2024, we had a fire incident at our Aberdeen, U.K. facility and we have recorded insurance recovery associated with business interruptions, increase in cost of work, and loss on property and assets during the three and nine months ended September 30, 2025 and 2024. During the three months ended September 30, 2025, Core Lab reached final settlement with the insurance company and recorded a gain of approximately \$5.3 million on the insurance recovery.

Foreign exchange (gain) loss, net by currency is summarized in the following table (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2025	2024	2025	2024

Interest Expense

Interest expense for the three months ended September 30, 2025, was \$2.7 million and decreased \$0.5 million or 15% year-over-year and 2% compared to the prior quarter. For the nine months ended September 30, 2025, interest expense decreased \$1.8 million or 18%.

The year-over-year and sequential decreases are primarily due to lower variable interest rates and average borrowings on our bank revolving credit facility during the three and nine months ended September 30, 2025.

Income Tax Expense (Benefit)

The Company recorded an income tax expense of \$3.8 million and \$7.4 million for the three and nine months ended September 30, 2025, respectively compared to income tax expense of \$4.7 million and \$10.0 million for the three and nine months ended September 30, 2024, respectively. The effective tax rate for the three and nine months ended September 30, 2025, was 20.5% and 22.7%, respectively. The effective tax rate for the three and nine months ended September 30, 2024, was 28.1% and 28.8%, respectively. The effective tax rate for the three and nine months ended September 30, 2025, was primarily impacted by the earnings mix of jurisdictions subject to tax for the period and changes in uncertain tax position in certain jurisdictions which is discrete to the quarter. The tax rate for the three and nine months ended September 30, 2024 was impacted by the earnings mix of jurisdictions subject to tax for the period and items discrete to the quarter.

On July 4, 2025, the Act was enacted into law. The Act includes significant provisions, including tax cut extensions and modifications to the U.S. and international tax frameworks. We are evaluating the impact of these legislative changes as additional guidance becomes available, and uncertainty remains regarding the timing and interpretation by tax authorities in affected jurisdictions. These legislative changes could have an adverse impact on our future effective tax rate, tax assets and liabilities, including our deferred tax assets and liabilities, and cash payments for tax.

Segment Analysis

We operate our business in two segments. These complementary operating segments provide different services and products and utilize different technologies for evaluating and improving reservoir performance and increasing oil and gas recovery from new and existing fields. The following tables summarize our results by operating segment (in thousands):

	Three Months Ended						Year-over-year	Sequential			
	September 30, 2025		September 30, 2024		June 30, 2025		%Change	%Change			
REVENUE:											
Reservoir Description	\$	88,224	66%	\$	88,840	66%	\$	86,280	66%	(1)%	2%
Production Enhancement		46,297	34%		45,557	34%		43,879	34%	2%	6%
Consolidated	\$	134,521	100%	\$	134,397	100%	\$	130,159	100%	0%	3%
OPERATING INCOME:											
Reservoir Description *	\$	16,574	19%	\$	16,487	19%	\$	12,203	14%	1%	36%
Production Enhancement *		4,379	9%		3,232	7%		3,148	7%	35%	39%
Corporate and Other ⁽¹⁾		(25)	0%		84	0%		(60)	0%	NM	NM
Consolidated	\$	20,928	16%	\$	19,803	15%	\$	15,291	12%	6%	37%

* Percentage, which represents operating margins, is based on operating income divided by applicable revenue rather than total revenue.

"NM" means not meaningful

(1) "Corporate and Other" represents those items that are not directly related to a particular operating segment.

	Nine Months Ended September 30,				Year-over-year	
	2025		2024		% Change

Consolidated	\$	<u>388,265</u>	100%	<u>\$ 394,611</u>	100%	(2)%
OPERATING INCOME (LOSS):						
Reservoir Description *	\$	31,116	12%	\$ 34,823	13%	(11)%
Production Enhancement *		9,030	7%	9,209	7%	(2)%
Corporate and Other ⁽¹⁾		490	0%	350	0%	NM
Consolidated	\$	<u>40,636</u>	10%	<u>\$ 44,382</u>	11%	(8)%

* Percentage, which represents operating margin, is based on operating income divided by applicable revenue rather than total revenue.
 "NM" means not meaningful

(1) "Corporate and Other" represents those items that are not directly related to a particular operating segment.

Reservoir Description

Reservoir Description operations are closely correlated with trends in international and offshore activity levels, with approximately 80% of its revenue sourced from existing producing fields, development projects and movement of crude oil products outside the U.S.

Revenue from the Reservoir Description operating segment of \$88.2 million for the three months ended September 30, 2025 decreased 1% year-over-year and increased 2% sequentially. Revenue in 2025 has been negatively impacted by the decrease in the success rate for international offshore exploration and appraisal wells, which reached a 20-year low for the six-month period ending March 31, 2025. The decrease in international offshore commercial success rates has resulted in the cancellation of several reservoir rock and fluid analysis projects that were originally planned for late 2024 and 2025. The slight decrease in year-over-year revenue was primarily due to lower revenue in reservoir rock and fluid analysis projects in the U.S. but was substantially offset by higher revenue from international projects and crude-assay services. Sequentially, the increase in revenue was primarily due to higher revenue in laboratory crude-assay services.

Revenue from the Reservoir Description operating segment of \$255.4 million for the nine months ended September 30, 2025 decreased 2% from the same period in the prior year. The decreased revenue in 2025 is primarily due to lower revenue in reservoir rock and fluid analysis in the U.S., as discussed above. The decrease is partially offset by higher revenue in international laboratory crude-assay services and higher laboratory instrument sales in 2025.

Operating income of \$16.6 million for the three months ended September 30, 2025, was relatively flat year-over-year and increased \$4.4 million sequentially. Operating margins were 19% for the three months ended September 30, 2025, comparable for the same period in the prior year, and 14% sequentially. Year-over-year, the changes in operating income and operating margins was primarily attributable to gains on insurance recovery associated with the fire at the Aberdeen, U.K. facility of \$5.3 million recorded in the three months ended September 30, 2025, compared to a \$3.2 million gain in the same period in prior year. The additional gain on insurance recovery was substantially offset by a different mix of revenue with a higher level of laboratory instrument sales in 2025, which yield a lower margin.

Sequentially, the increase in operating income and operating margins was primarily due to 1) incremental revenue of \$2.0 million in the three months ended September 30, 2025; and 2) insurance recovery associated with the fire at the Aberdeen, U.K. facility of \$5.3 million recorded in the three months ended September 30, 2025, compared to a \$2.6 million recorded in the prior quarter.

Operating income of \$31.1 million for the nine months ended September 30, 2025, decreased \$3.7 million from the same period in the prior year. Operating margins were 12% for the nine months ended September 30, 2025, compared to 13% for the same period in the prior year. The decrease in operating income and operating margins was primarily attributable to 1) a lower

level of revenue in 2025; 2) a different mix of revenue with a higher level of laboratory instrument sales that yield lower margin compared to service revenue; and 3) a total charge of \$2.7 million associated with employee severance, facility consolidation and asset write-down recorded in 2025 compared to \$1.5 million recorded in the same period in prior year. The decrease in operating income and operating margins was partially offset by a higher insurance recovery associated with the fire at the Aberdeen, U.K. facility in the nine months ended September 30, 2025, compared to the same period in prior year.

Production Enhancement

Production Enhancement operations are largely focused on complex completions in unconventional oil and gas reservoirs in the U.S. as well as conventional projects across the globe. U.S. onshore drilling and completion activities typically experience a seasonal decline at end of the year with activity levels increasing at the beginning of the year. Average rig count in the U.S. land market for the three months ended September 30, 2025, was down by 7% year-over-year and 6% sequentially. International rig count was down 6% year-over-year and relatively flat sequentially.

Revenue from the Production Enhancement operating segment of \$46.3 million for the three months ended September 30, 2025, increased 2% year-over-year and 6% sequentially. Year-over-year, the increase was primarily driven by a strong growth in well completion diagnostic services in the U.S. and international markets. Sequentially, the increase was primarily driven by increased product sales in bulk shipment in the international markets, and continued growth in well completion diagnostic services for projects in the Gulf of Mexico.

Revenue from the Production Enhancement operating segment of \$132.9 million for the nine months ended September 30, 2025, decreased 2% from the same period in the prior year. The decrease in revenue is primarily due to lower product sales in the U.S. land market in 2025, partially offset by higher revenue in well completion diagnostic services in the U.S. and international markets.

Operating income of \$4.4 million for the three months ended September 30, 2025, increased \$1.1 million year-over-year, and increased \$1.2 million sequentially. Operating margins for the three months ended September 30, 2025, were 9%, compared to operating margins of 7% year-over-year and sequentially. Year-over-year, the increase in operating income and margins was primarily driven by a different mix of revenue with higher well completion diagnostic service revenue that yields a higher margin. Sequentially, the increase in operating income and margins was primarily driven by incremental revenue of \$2.4 million in the three months ended September 30, 2025.

Operating income of \$9.0 million for the nine months ended September 30, 2025, decreased \$0.2 million compared to the same period in the prior year. Operating margins for the nine months ended September 30, 2025 of 7% were comparable to the same period of the prior year. The slight decrease in operating income and margins was primarily due to a higher absorption of fixed costs on lower product sales that is partially associated with increased tariff cost on certain imported materials, substantially offset by higher margin yield from well completion diagnostic service revenue as discussed above.

Liquidity and Capital Resources

General

We have historically financed our activities through cash on hand, cash flows from operations, bank credit facilities, equity financing and the issuance of debt. Cash flows from operating activities provide the primary source of funds to finance operating needs, capital expenditures, dividends and our share repurchase program. Our ability to maintain and grow our operating income and cash flow depends, to a large extent, on continued investing activities. We believe our future cash flows from operations, supplemented by our borrowing capacity and the ability to issue additional equity and debt, should be sufficient to fund our debt requirements, capital expenditures, working capital, dividends, share repurchase program and future acquisitions. The Company will continue to monitor and evaluate the availability of capital in the debt and equity markets.

We are a holding company incorporated in Delaware. Therefore, we conduct substantially all of our operations through our subsidiaries. Our cash availability is largely dependent upon the ability of our subsidiaries to pay cash dividends or otherwise distribute or advance funds to us and on the terms and conditions of our existing and future credit arrangements. There are no restrictions preventing any of our subsidiaries from repatriating earnings, except for the unrepatriated earnings of our Russian subsidiary which are not expected to be distributed in the foreseeable future, and there are no restrictions or income taxes associated with distributing cash to the parent company through loans or advances. As of September 30, 2025, \$22.2 million of our \$25.6 million of cash was held by our foreign subsidiaries.

The Company maintains the quarterly dividend of \$0.01 per share.

Cash Flows

The following table summarizes cash flows (in thousands):

	Nine Months Ended September 30,		% Change
	2025	2024	
Cash flows provided by (used in):			
Operating activities	\$ 29,085	\$ 35,773	(19)%
Investing activities	1,521	(2,835)	NM
Financing activities	(24,134)	(26,584)	(9)%
Net change in cash and cash equivalents	<u>\$ 6,472</u>	<u>\$ 6,354</u>	2%

Comparing the nine months ended September 30, 2025 to the same period in the prior year, cash flows provided by operating activities decreased to \$29.1 million in 2025 compared to \$35.8 million in 2024. Net income for the nine months ended September 30, 2025 includes gain on insurance proceeds associated with assets of \$6.8 million compared to \$2.1 million in the same period in the prior year. Additionally, cash from operating activities was impacted by a decrease in working capital in 2025 compared to the same period in the prior year.

Cash flows provided by investing activities for the nine months ended September 30, 2025 of \$1.5 million include proceeds on the sale of assets of \$2.4 million, proceeds from insurance recovery associated with the fire incident at the Aberdeen, U.K. facility of \$10.0 million, and proceeds on company owned life insurance policies of \$0.8 million, offset by total capital expenditures of \$10.9 million and a business acquisition, net of cash acquired of \$0.6 million. Cash flows used in investing activities for the nine months ended September 30, 2024 of \$2.8 million include the funding of \$8.6 million for capital expenditures, partially offset by \$2.1 million of proceeds from insurance recovery associated with the 2024 fire incident, \$0.9 million of proceeds from the sale of assets and \$2.8 million of net proceeds received from company owned life insurance policies.

Cash flows used in financing activities for the nine months ended September 30, 2025 of \$24.1 million include an \$11.0 million net reduction in long-term debt, \$1.7 million of debt issuance costs associated with the renewal of our credit facility, \$1.4 million for quarterly dividends, and \$9.8 million used to repurchase the Company's common stock. Cash flows used in financing activities for the nine months ended September 30, 2024 of \$26.6 million include a \$24.0 million net reduction in long-term debt, \$1.4 million for quarterly dividends, \$0.4 million used to repurchase the Company's common stock and \$0.8 million in costs associated with equity transactions.

During the nine months ended September 30, 2025, we repurchased 831,478 shares of our common stock for \$9.8 million, including rights to 16,915 shares of our common stock to satisfy personal tax liabilities of participants in our stock-based compensation plan for an aggregate purchase price of \$211 thousand.

We utilize the non-GAAP financial measure of free cash flow to evaluate our cash flows and results of operations. Free cash flow is defined as net cash provided by operating activities (which is the most directly comparable GAAP measure) less cash paid for capital expenditures. Management believes that free cash flow provides useful information to investors regarding the

cash available in the period that was in excess of our needs to fund our capital expenditures and operating activities. Free cash flow is not a measure of operating performance under GAAP and should not be considered in isolation nor construed as an alternative to operating income, net income (loss) or cash flows from operating, investing or financing activities, each as determined in accordance with GAAP. Free cash flow does not represent residual cash available for distribution because we may have other non-discretionary expenditures that are not deducted from the measure. Moreover, since free cash flow is not a measure determined in accordance with GAAP and thus is susceptible to varying interpretations and calculations, free cash flow as presented, may not be comparable to similarly titled measures presented by other companies. The following table reconciles this non-GAAP financial measure to the most directly comparable measure calculated and presented in accordance with GAAP (in thousands):

	Nine Months Ended September 30,		
	2025	2024	% Change
Free cash flow calculation:			
Net cash provided by operating activities	\$ 29,085	\$ 35,773	(19)%
Less: Cash paid for capital expenditures - operations	(8,265)	(8,647)	(4)%
Free cash flow	<u>\$ 20,820</u>	<u>\$ 27,126</u>	(23)%

Free cash flow for the nine months ended September 30, 2025, decreased \$6.3 million from \$27.1 million for the same period in 2024. The net cash provided by operating activities of \$29.1 million during the nine months ended September 30, 2025, decreased \$6.7 million primarily due to the factors as discussed in the cash flow from operating activities above. Capital expenditures-operations, which exclude capital expenditures of \$2.7 million associated with the Aberdeen, U.K. fire incident and are covered by insurance, decreased slightly by \$0.4 million during the nine months ended September 30, 2025 compared to the same period in the prior year.

Credit Facility, Senior Notes and Available Future Liquidity

We, along with CLIH, have secured the Credit Facility for an aggregate borrowing commitment of \$150.0 million with a \$50.0 million “accordion” feature. As of September 30, 2025, the Credit Facility has an available borrowing capacity of approximately \$131.9 million.

See Note 7 – *Long-term debt, net* of the Notes to the Interim Consolidated Financial Statements, for additional information regarding the Credit Facility.

Additionally, we along with CLIH as issuer, have senior notes outstanding that were issued through private placement transactions.

These debt instruments are summarized in the following table (in thousands):

	Interest Rate	Maturity Date	September 30, 2025	December 31, 2024
Credit Facility			\$ 7,000	\$ 18,000
2021 Senior Notes Series A ⁽¹⁾	4.09%	January 12, 2026	45,000	45,000
2021 Senior Notes Series B ⁽¹⁾	4.38%	January 12, 2028	15,000	15,000
2023 Senior Notes Series A ⁽²⁾	7.25%	June 28, 2028	25,000	25,000
2023 Senior Notes Series B ⁽²⁾	7.50%	June 28, 2030	25,000	25,000
Total long-term debt			117,000	128,000
Less: Debt issuance costs			(2,897)	(1,889)
Long-term debt, net			<u>\$ 114,103</u>	<u>\$ 126,111</u>

(1) Interest is payable semi-annually on June 30 and December 30.

(2) Interest is payable semi-annually on March 28 and September 28.

In accordance with the terms of the Credit Facility, our leverage ratio is 1.10, and our interest coverage ratio is 7.86, each for the period ended September 30, 2025. We are in compliance with all covenants contained in our Credit Facility and Senior

Notes as of September 30, 2025. Certain of our material, wholly owned subsidiaries are guarantors or co-borrowers under the Credit Facility and Senior Notes. See Note 7 - *Long-term Debt, net* of the Notes to the Interim Consolidated Financial Statements for additional information regarding the terms and financial covenants of the Credit Facility and the Senior Notes.

See Note 11 - *Derivative Instruments and Hedging Activities* of the Notes to the Interim Consolidated Financial Statements, for additional information regarding interest rate swap agreements we have entered to fix the underlying risk-free rate on our Credit Facility and the 2023 Senior Notes.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in market risk from the information provided in Item 7A. “Quantitative and Qualitative Disclosures About Market Risk” of Core Laboratories Inc.'s Annual Report on Form 10-K for the year ended December 31, 2024.

Item 4. Controls and Procedures

A complete discussion of our controls and procedures is included in Core Laboratories Inc.'s Annual Report on Form 10-K for the year ended December 31, 2024.

Disclosure Controls and Procedures

Our management, under the supervision of and with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, as of the end of the period covered by this report. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed by us in our reports filed or submitted under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure and is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of September 30, 2025, at the reasonable assurance level.

Our management does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent all errors and all fraud. Further, the design of disclosure controls and internal control over financial reporting must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

Changes in Internal Control Over Financial Reporting

There have been no changes in our system of internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, during the fiscal quarter ended September 30, 2025 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

See Note 9 - *Commitments and Contingencies* of the Notes to the Interim Consolidated Financial Statements in Part I, Item 1 of this Quarterly Report.

Item 1A. Risk Factors

Our business faces many risks. Any of the risks discussed in this Quarterly Report or our other SEC filings could have a material impact on our business, financial position or results of operations.

Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also impair our business operations. For a detailed discussion of the risk factors that should be understood by any investor contemplating investment in our securities, please refer to “Item 1A - Risk Factors” in Core Laboratories Inc.’s Annual Report on Form 10-K for the year ended December 31, 2024. In addition to the risk factors identified in our 2024 Annual Report, we updated the following risk factor:

Tariffs and other trade measures could adversely affect our business, results of operations, financial position and cash flows.

Our business and results of operations may be adversely affected by uncertainty and changes in U.S. trade policies, including tariffs, trade agreements or other trade restrictions imposed by the U.S. or other governments. Our input costs for raw materials and other goods, such as steel, electronic components, chemical reagents and laboratory equipment, are adversely affected by tariffs imposed by the U.S. government on products imported into the United States. Additionally, we sell our products internationally and our product sales may be subject to any retaliatory measures by other countries. Any imposition of or increase in tariffs on the goods we purchase or the products we sell could increase our costs and the price of our products and services. To the extent we are unable to pass all or a portion of these cost increases on to our customers, such cost increases could adversely affect our results of operations.

Additional tariffs, further trade restrictions and retaliatory trade measures could disrupt our supply chain and logistics, restrict or limit the availability of goods or supplies, cause adverse financial impacts due to volatility in foreign exchange rates and interest rates, and inflationary pressures on raw materials. It may be time-consuming and expensive for us to alter our business operations to adapt to or comply with any changes in international trade policies and agreements and any failure to do so could have a material adverse effect on our business. Any potential impact will depend on future developments with respect to trade policy and the results of trade negotiations, all of which are beyond our control. These potential impacts, while uncertain, could adversely affect our business, results of operations and financial condition.

Tariffs or other trade restrictions may lead to continuing uncertainty and volatility in U.S. and global financial and economic conditions and commodity markets, declining consumer confidence, significant inflation and diminished expectations for the economy, and ultimately reduced demand for our products and services and the demand for crude oil and gas. Such conditions could have a material adverse impact on our business, results of operations and cash flows.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Unregistered Sales of Equity Securities

None.

Issuer Purchases of Equity Securities

The following table provides information about our purchases of shares of our common stock, par value \$0.01, that are registered by us pursuant to Section 12 of the Exchange Act during the three months ended September 30, 2025:

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program ⁽²⁾	Maximum Number of Shares That May Yet be Purchased Under the Program ⁽²⁾
July 1-31, 2025	172,070	\$ 11.45	—	—
August 1-31, 2025	275,030	\$ 10.38	—	—
September 1-30, 2025	15,148	\$ 12.16	—	—
Total	<u>462,248</u>	\$ 10.84	<u>—</u>	<u>—</u>

- (1) During the three months ended September 30, 2025, 4,461 shares were surrendered to us by participants in a stock-based compensation plan to settle any personal tax liabilities which may result from the award. Additionally, we purchased 457,787 shares in the open market. Repurchases of common stock are at the discretion of the board of directors and management.
- (2) The Company does not have a formal share repurchase program; however, it does from time to time undertake share repurchases in the open market at the discretion of Company management and with prior authorization from the Board of Directors.

Item 5. Other Information

During the three months ended September 30, 2025, no director or officer of the Company adopted, modified or terminated any “Rule 10b5-1 trading arrangement” or “non-Rule 10b5-1 trading arrangement” within the meaning of Item 408(a) of Item 408 of Regulation S-K.

Item 6. Exhibits

Exhibit No.	Exhibit Title	Incorporated by reference from the following documents
10.1	- Core Laboratories Inc. Nonqualified Deferred Compensation Plan for Board of Directors	Filed herewith
10.2	- Ninth Amended and Restated Credit Agreement, dated July 22, 2025, by and among, Core Laboratories Inc. and Core Laboratories (U.S.) Interests Holdings, Inc., as borrowers, Bank of America, N.A., as administrative agent and the other lenders party hereto	Form 8-K, July 23, 2025 (File No. 001-41695)
